

Meridian Energy – Davis Refinery
October 19, 2017 Conference Call (Summary)
ND Dept. of Health / EPA Region 8 / National Park Service / Fish & Wildlife Service

I. Introductions (All)

Participants included:

National Park Service: Don Shepherd, Jon Notar and Kirsten King

EPA Region 8: Gail Fallon, Patrick Wauters, DJ Law and Rebecca Matichuk

Fish & Wildlife Service: Catherine Collins

ND Dept. of Health (NDDH): Terry O’Clair, David Stroh, Rheanna Kautzman, Angie Seligman, Jim Semerad and Craig Thorstenson

- David Stroh (destroh@nd.gov) is the lead NDDH reviewer for the Meridian Project.
- Rheanna “Ray.” Kautzman (rkautzman@nd.gov) is the lead NDDH modeler for the Meridian project.
- The phone number for all NDDH staff is 701-328-5188.

II. Follow-up on Discussion Items from Previous Calls (All)

- Title V applicability: EPA’s initial opinion is that the Davis Refinery (as a minor source) will ultimately need to obtain a Title V permit based on the lack of a Title V exemption in some of the applicable NSPS standards. A more formal EPA position can be provided by EPA if requested by NDDH.

III. New Discussion Items (All)

- Dispersion modeling review (NDDH update): NDDH has completed an initial review of the modeling. Modeling results are below both the Class I and Class II SILs. NPS asked for the AERMOD inputs and NDDH indicated that the inputs will be sent to NPS (update: the modeling inputs were sent by NDDH to NPS via email on 10/20/17).
- Visibility and deposition modeling: NDDH plans to run VISCREEN and deposition modeling. NPS will provide assistance regarding this modeling and offered to work with NDDH on the modeling procedure.

IV. Path Forward

- Status of Application Review (NDDH)
 - o NDDH is moving ahead with review of the application.
 - o Next conference call is scheduled for November 16th at 12:30 MT / 1:30 CT.
